DETAILED ACTION

1. This Office Action is in response to the Applicant's amendment October 14, 2008.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John A. Smart (Reg. No. 34,929) on October 14, 2008.

Please amend the claims as follows:

Claim 1:

A method for controlling connections to a new computer upon its initial deployment, the method comprising:

before deployment of the new computer, imaging the computer's storage to include a preconfigured security update policy for preventing Internet-borne infections occurring before the computer can obtain security-relevant updates;

upon the initial deployment of the new computer, applying said preconfigured security update policy to establish at the computer a pre-access restricted zone of at least one preapproved host that the computer is restricted to connect to upon its initial deployment for obtaining current security-relevant updates, so that without relying on any external network-based security mechanisms the computer is provided with a fully

Art Unit: 2437

self-contained enforcement mechanisms that completely blocks the computer ~~blocked~~ from all other connectivity to the Internet until security-relevant updates have been completed;

receiving a request for a connection from the computer to a particular host;

based on said preconfigured security update policy, determining whether the particular host is within the restricted zone of at least one preapproved host;

blocking said connection if said particular host is not within the restricted zone of at least one preapproved host; and

once the computer has complied with the security update policy, lifting the restricted zone so that the computer is allowed to participate with general connectivity to the Internet.

Claim 26:

A computer system that is preconfigured to control connections upon the initial connections upon the initial deployment, the system comprising:

a new computer that, before deployment, is imaged to include a preconfigured security update policy that establishes a restricted zone of at least one preapproved host that the computer is restricted to connect to upon the initial deployment of the computer, so that without relying on any external network-based security mechanisms the computer is provided with a fully self-contained enforcement mechanism that completely blocks the computer ~~blocked~~ from all other connectivity to the Internet until security relevant updates have been completed;

Art Unit: 2437

a connectivity module for processing user requests for the computer to connect to a particular host; and

a security module, located at the computer, for determining whether the particular host is within the restricted zone of at least one preapproved host based on said preconfigured security update policy, and for blocking any attempt to connect to a host that is not within the restricted zone of at least one preapproved host, until the computer is brought into compliance with the security update policy.

Claim 49:

A method for enforcing pre-access connectivity restrictions on a new machine so as to enforce security updates, the method comprising:

before deployment, incorporating into the new machine an initial security update policy that prevents computer infections occurring before the new computer can obtain security-relevant updates;

detecting attempts to connect the new machine to other devices;

determining at the new machine, based on an said initial security update policy that establishes a restricted zone of acceptable connections, which devices the new machine is permitted to connect to, so that without relying on any external network-based security mechanisms the machine is provided with a fully self-contained enforcement mechanisms that ~~not allowed to participate~~ prevents the machine from participating with general connectivity to the Internet until security-relevant updates have been applied to the machine; and

blocking at the new machine any connection that attempts to connect the new machine to a device outside the restricted zone of acceptable connections, so that the machine cannot participate with general connectivity to the Internet until the machine is brought into compliance with the security update policy.

Allowable Subject Matter

3. Claims 1-70 are allowed.

The following is an examiner's statement of reasons for allowance:

As per claim 1:

The prior art on record either taken singularly or in combination fail to teach specifically "*before deployment of the new computer, imaging the computer's storage to include a preconfigured security update policy for preventing Internet-borne infections occurring before the computer can obtain security-relevant updates; upon the initial deployment of the new computer, applying said preconfigured security update policy to establish at the computer a pre-access restricted zone of at least one preapproved host that the computer is restricted to connect to upon its initial deployment for obtaining current security-relevant updates, so that without relying on any external network-based security mechanisms the computer is provided with a fully self-contained enforcement mechanisms that completely blocks the computer from all other connectivity to the Internet until security-relevant updates have been completed*" including all the other limitations recited in claim 1.

Independent claims 26 and 49 have similar limitations as claim 1 and therefore are also allowed for the same reason set forth above.

Dependent claims 2-25, 27-48 and 50-70 are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHEWAYE GELAGAY whose telephone number is (571)272-4219. The examiner can normally be reached on 8:00 am to 5:30 pm.
